Construction

The structural project of the hull has been carried out according to acknowledged classification committee, RINA, which approved the project. Vinylester resin is used for the first coats of the hand laid-up lamination below the waterline Worldwide acknowledged quality isophtalic resin is

used for all the stages of the hand laid up lamination process. High quality PVC with outstanding mechanical peculiarities is used for main deck and superstructure lamination with sandwich core. Extreme aft and bow bulkhead are in fiberglass with sandwich core. All other internal bulkheads are built with advanced composite.

Deck Equipment

- Walk-around decks w/ fuel fillers on each side
- Stainless steel handrail on the bulwark
- House holes in the bulwark
- (2) Side boarding gates at mid-ship, each side
- Side boarding ladder
